

## Student Comments for MARCELLO, ELIZABETH MARIE for Fall 2020

Course	Comments
URBS 10100 Sec: 01	My favorite professor I've had this semester because she is very understanding and actually seems interested in her students as well as the course material.
	Professor Marcello is amazing. She does not think she is smarter or wiser than her students. She is willing to learn and grow from her students which is something you don't see often. She admits when she does not know the answer to a question and goes out of her way to research and post the answers to those kinds of questions. I'm a big fan of her teaching style and she is really rooting for all of her students. I hope to be able to take a class of hers again in the future.
	You are a wonderful professor and I really enjoy being in your class. I think you are doing a wonderful job, you are my favorite professor and your classes are super engaging!
	I've never been particularly interested in Urban Studies but this class changed that! I love that it challenged my view of the city and opened me up to a lot of what is really going on. Thank you for being such a wonderful teacher!
	This honestly was one of the best classes I've ever taken. I looked forward to class and enjoyed going every single time. I am so thankful that I had you as a professor and I am very thankful to have taken this course because not only are you literally the most amazing person, and not only do we share the SAME middle name, but you're an amazing teacher. I really did learn so much in this class, more than I thought I was. thank you once again for a great semester and for being the wonderful person that you are. Stay Golden :)
	Ms. Marcello is one of the best professors Ive had so far. She always started class on time and before class started she would always check on her were. When class started her presentations were very organized and broke done complex topics that were presented in the texts we would read. A lot of the students were very engaged with the class and participation was always expected. The atmosphere in the class felt very relaxed. She was very accosting to the work she assigned, she would push back deadlines if we asked (we always asked with a reason). The work she gave was appropriate throughout the whole semester. Overall, I love her teaching style, very organized, and engages with her students both emotionally and verbally (since we have class over zoom).
	she is very kind and understanding, as well as well educated and comfortable with the subject. she explains everything very clearly while answering questions and encouraging productive discussions
	Your teaching is truly superb. I thought that this class would be extremely boring, but you definitely change my mind. I enjoyed extending my understanding of the inner-workings of the city.
	Thank you very much for your work! It is extremely precious to study the subject from a person that genuinely cares about it -- thank you for emphasizing the knowledge and the aim to understand versus making the subject unbearable and boring even for someone who really is into Urbanism and its studies. I picked Urban Studies as a Major and hope that someday I'll get lucky to take another class from you :)
	Overall, the course was one of the best I've taken and it was always a pleasure coming to class. The work was engaging and was never dull, and I enjoyed the breakout room format.
	She was one of the best professors I've ever had! I truly appreciate her constant positive energy and bright personality throughout all the classes! I really enjoyed attending her class every Monday and Thursday! She made online school feel less like a drag and I was actually excited for each and every class. Thank you so much professor!!!!!!! :)
	Professor Marcello was a great teacher. I am so happy that I had her for my first semester at Hunter as she has now set the standard. She has been so kind and understanding during a difficult time like the pandemic and I can see my classmates really appreciate that. She gives very interesting reading and brings insightful conversations to the class. She is a 10/10 professor and I would take her class again.
	In the beginning, I honestly didn't know what to expect from this class. As an incoming freshman, I was a bit nervous about how my first semester would go, but professor Marcello provided an education-friendly and very welcoming environment in her class which made for an easier transition into college and I am extremely grateful for that. She is a fair grader and when in need of help, is always there to help. Though this course was a core required class for me, I'm glad that I took this class and had her as my professor. This course gave me a better insight into the city that I live in, and about things that I either never really paid much attention to or never knew the reason behind why things were structured the way that they are, and I would definitely recommend this class to others.
	Professor Marcello was a great online instructor. The lecturing and powerpoints were informative and the breakout rooms made the class less boring. I feel there is not much of a difference between the instruction I received this semester and the instruction I would have received in normal circumstances. Professor Marcello offered effective and encouraging feedback in a timely manner. I appreciated her understanding of the difficulty we had attending school while in a pandemic and her adjusting the project expectations and their due dates based on student feedback. She really has expanded my interest in the topic and I hope to be able to take a course by Professor Marcello in the future.
	I thought both the class and teacher were amazing. Even if I looked for a reason to complain, I wouldn't be able to find it.
